PROJECTS

CareerAI — AI-Powered Career & Interview Assistant | *React.js, Node.js, Express.js, MongoDB, OpenAI API*

- Built an AI-powered platform that analyzes uploaded resumes and generates personalized mock interview questions using LLM-based prompting, with structured feedback on user responses.
- Designed a resume parsing pipeline to extract skills, experience, and keywords, enabling tailored question generation based on the candidate's background.
- Implemented a feedback scoring system evaluating answer clarity, relevance, and structure, giving users actionable improvement suggestions after each mock session.

LinkForge — Smart URL Management Platform | *React.js, Node.js, Express.js, MySQL, Redis*

- Built a URL shortening platform generating unique short codes via base62 encoding, with collision detection and custom alias support.
- Designed a click analytics system tracking redirects by timestamp, device type, and referrer, visualized through a React dashboard with charts.
